Appendix 3-34

Twinsburg
Facilities Planning Area
Twinsburg Facilities Planning Area

I. Existing Situation
   A. County/Basin:
      Summit/Lake Erie

   B. Facilities Planning Area:
      Twinsburg

   C. Designated Management Agency (MA):
      I. Primary MA
         a) City of Twinsburg
      II. Secondary MA
         a) Summit County Metropolitan Sewer District SCMSD (Department of Sanitary Sewer Services)

   D. Publicly-Owned Treatment Works:
      Twinsburg WWTP, 3.4000 MGD

   E. Facilities Plan:
      I. John David Jones and Associates, Inc., The City of Twinsburg Facilities Plan, was submitted to Ohio EPA in December, 1985. However, the plan which was prepared by Finkbeiner, Pettis and Strout, was subsequently approved by Ohio EPA in March, 1986.

   F. Area Served:
      City of Twinsburg, Twinsburg Township, Village of Reminderville

   G. Receiving Stream:
      Tinkers Creek

   H. Contact Person/Address/Phone/Fax:
      Mr. Christopher Campbell, Public Works Director
      City of Twinsburg
      Division of Public Works
      10231 Ravenna Road
      Twinsburg, Ohio 44087
      Phone: (330) 963-6260
      Fax: (330) 963-7751
Mr. Michael A. Weant, Director
Summit County Department of Sanitary Sewer Services
1180 S. Main St., Suite 201
Akron, Ohio 44301
Phone: (330) 926-2405
Fax: (330) 926-2471

I. Population Served:
The population projections used in the 201 Plan and those in the NEFCO 208 Clean Water Plan are compared below.

The above population projections (Approved 208) were prepared in 1990. Updated projections are scheduled to be prepared after county population projections are produced by the Ohio Department of Development Office of Strategic Research.

Note: Aurora Westerly projections were included by NEFCO for reference. These figures include population from Aurora.

II. Wastewater Treatment Planning Prescriptions and Wastewater Planning Options
Original source information provided by the City of Twinsburg’s Public Works Director, December 5, 2000 and by the Summit County Department of Environmental Services, May 1, 2000.

City of Twinsburg Jurisdiction
Areas Currently Sewered (yellow):
These areas are currently served with sanitary sewers that have been constructed and are currently in operation. However, there may be undeveloped tracts of land and/or single-family homes that are being served by home sewage treatment systems (HSTS) within this area. Existing HSTSs shall be connected to the public sanitary sewer system upon failure. All new development and construction in the yellow areas of this facilities planning area will be required to connect and/or provide sanitary service to ensure that wastewater will be treated and discharged at an existing publicly-owned treatment works.

Areas that will be served by a POTW or by on-site non-discharging systems (green):
These areas are currently not served with sanitary sewer and are predominantly rural in character with large undeveloped tracts of land and vacant lots subject to improvement. All new subdivision development, whether residential or non-residential, will be required to connect and/or provide sanitary service to ensure that wastewater will be treated at an existing POTW. Remote metes-and-bounds residential parcels may be improved with new HSTSs provided that the local health department finds that soils are suitable or the
other mutually agreeable methods of wastewater treatment can be obtained without causing off-lot discharge of effluent. Existing non-single family private treatment systems which fail to operate properly will be required to connect and/or provide sanitary service to ensure that wastewater will be treated at an existing POTW. Failing HSTs servicing single-family homes shall be abandoned in accordance with Ohio Administrative Code 3701-29-02 (OAC 3701-29-02). However, exceptions may be (granted/requested) based on sewer availability, soil conditions, extent of failure, type of replacement system and cost of repair, provided that the local health department finds that soils are suitable to assure there will be no off-lot discharge of effluent and there is no conflict with OAC 3701-29-02.

*County of Summit Department of Sanitary Sewer Services Jurisdiction – Village of Reminderville, Twinsburg Township*

**Areas Currently Sewered (yellow):**

These areas are currently served with sanitary sewers that have been constructed and are currently in operation. All new development and construction in the yellow areas of this facilities planning area will be required to connect and/or provide sanitary service to ensure that wastewater will be treated at an existing POTW. Failing HSTs serving single-family homes shall be abandoned in accordance with Ohio Administrative Code 3701-29-02. Existing non-single-family private treatment systems which fail to operate properly will be required to connect to and/or provide sanitary service to ensure that wastewater will be treated at an existing POTW.

**Areas That Will be Served by a POTW or by On-Site Non-discharging Systems (green):**

The Pond Brook area of Summit County is predominantly rural with large undeveloped tracts of land and vacant lots subject to improvement and has no existing subdivisions using HSTs for wastewater treatment. All new subdivision development, whether residential or non-residential, and all other new non-residential, and new multi-family residential development, will be required to connect to and/or provide sanitary service to ensure that wastewater will be treated at an existing POTW. Remote metes-and-bounds residential parcels may be improved with new HSTs provided the local health department finds that soils are suitable or that other mutually agreeable methods of wastewater treatment can be obtained without causing off-lot discharge of effluent. Any existing system, either residential or non-residential, that fails to operate properly shall be required to connect to and/or provide sanitary sewer service to ensure wastewater will be treated at an existing POTW unless sewers are not available and accessible. If sewers are not available and accessible, and a replacement onsite system cannot be constructed, a discharge permit must be obtained from Ohio EPA and a design and installation permit must also be obtained for the new system from either the Ohio EPA in accordance with the Ohio Administrative Code (OAC) 3745-42 or the local health department in accordance with OAC 3701-29.
